

### **Earth is the best planet in the universe. We must preserve it for future generations!**

Unitsky String Technologies Inc. is a company that creates a safe, reliable, and environmentally friendly transport system that has no analogues in the world.

The top management of Unitsky String Technologies Inc. is fully aware of its responsibility to society for preserving ecological balance and enhances sustainable use of natural resources and creation of favorable environmental conditions – a key factor in health and longevity of the global population.

### **Our main goal is to create a transport that is in harmony with nature, meets the high modern requirements, and contributes to the betterment of human life.**

To achieve this goal and comply with the principles of the Environmental Policy, the top management of Unitsky String Technologies Inc. undertakes the following liabilities:

- complying with the requirements of legislation and other regulatory legal acts in the field of environmental protection, including STB ISO 14001-2017 and ISO 14001:2015, which apply to the company's activities and require their abidance by contractors, suppliers, and visitors;
- making managerial and investment decisions based on multiple development scenarios taking into account environmental priorities;
- implementing the best modern technologies and innovations in production and environmental activities in order to reduce the impact on the environment while creating string transport systems;
- conducting regular work on identification, assessment, and analysis of risks and opportunities, and making decisions to prevent their adverse impact on the environment, as well as to prevent environmental accidents and emergencies;
- exercising strict control and ensuring a rational use of all types of resources in the course of production activities;
- ensuring an appropriate level of competence and continuous upgrading of personnel skills in the field of professional activities, as well as in the field of environmental protection;
- improving the system of motivation and incentives in order to involve each employee in the activities to achieve the company's environmental goals, as well as to understand personal responsibility for achieving results;
- implementing the best methods of environmental management in accordance with national and international standards, improving the level of industrial environmental control and monitoring, analyzing and evaluating the effectiveness of the environmental management system;
- ensuring openness and accessibility of objective and well-grounded information about the impact of the company's activities on the environment.

The top management of Unitsky String Technologies Inc. takes responsibility for allocating resources sufficient for the implementation of the stated Policy, functioning, and continuous improvement of the environmental management system, and undertakes to demonstrate its involvement and interest in environmental safety issues.

The Environmental Policy of Unitsky String Technologies Inc. expresses the company's position in relation to the environment and the implementation of the principles of sustainable development under modern conditions and is the basis for planning activities in the field of environmental protection.
